Abstracts

The global GaN Power Devices for AI Server Power Supplies market size is predicted to grow from US\$ 60.65 million in 2025 to US\$ 463 million in 2032; it is expected to grow at a CAGR of 31.6% from 2026 to 2032.

GaN power devices for AI server power supplies are gallium nitride power semiconductors used in AI server PSUs and high-density power-delivery architectures, primarily including discrete GaN FETs, driver-integrated GaN power stages, and GaN power ICs. These devices are deployed in power-factor-correction stages, LLC and isolated DC-DC conversion, 48 V/54 V intermediate-bus conversion, and auxiliary power, where high switching frequency, low switching loss, and negligible reverse-recovery loss support higher conversion efficiency and power density in high-power CRPS and OCP server supplies. Mainstream high-voltage products are currently concentrated around the 600–700 V class, while 100–150 V devices address 48 V bus-related DC-DC stages; higher-voltage GaN devices for emerging 800 V DC architectures are moving through development and qualification. This market focuses on GaN power semiconductors sold as key switching devices for AI server power supplies serving cloud, colocation, enterprise, telecom, and research data centers. The blended gross margin is approximately 45%.

Market Trends

Rising accelerator power, GPU density, and rack-level loading are moving server power supplies beyond conventional 3 kW designs toward 4.5–8.5 kW and higher power-density platforms. GaN is therefore shifting from an efficiency-only proposition to a system-level tool for shrinking magnetics, reducing PSU volume, and improving high-frequency transient response. The 650 V class remains central to high-frequency

isolated DC-DC stages, while 100–150 V devices are gaining relevance in 48 V/54 V bus architectures. Higher-voltage GaN aimed at emerging 800 V DC systems represents the next technology extension as AI infrastructure moves toward megawatt-scale racks.

Drivers

Higher AI accelerator power is lifting PSU output and power-density requirements, while data-center operators and power-supply vendors continue to target stringent efficiency levels such as 80 PLUS Titanium and Ruby and lower facility PUE. GaN can reduce switching losses at high frequency and enable smaller magnetic components, allowing PSU designers to raise rated power within established CRPS and OCP form factors. This makes GaN an increasingly important upgrade path for dense AI server power systems.

Restraints

GaN still carries higher device cost, more demanding gate-drive and EMI design requirements, thermal-management constraints, and longer mission-profile qualification than mature silicon solutions. At higher voltage and power levels, designers must also balance GaN against SiC on efficiency, robustness, and system cost. Optimized superjunction MOSFETs remain economically attractive in some lower-power server supplies, so adoption is progressing by topology and power stage rather than through uniform replacement.

Opportunities

PSUs above 4.5 kW, OCP power shelves, and 48 V/54 V intermediate-bus conversion are the clearest near-term growth areas. As AI racks move toward several hundred kilowatts and beyond, 800 V DC architectures could create new demand for GaN above the conventional 650 V class, more integrated power stages, and auxiliary-power ICs. Top-side or dual-side thermal designs and higher functional integration also offer suppliers a route to increase device value while reducing component count and cooling-system volume.

Challenges

AI server architectures are evolving rapidly, and PSU voltage, output power, form factor, and topology standards are not yet static. Device suppliers must simultaneously meet

efficiency, reliability, short-circuit robustness, thermal performance, and supply-security expectations. If SiC develops a stronger cost-performance position in the main conversion stages of 800 V architectures, GaN may remain concentrated in lower-voltage and higher-frequency stages. Wafer capacity, advanced packaging availability, and lengthy customer qualification can also constrain ramp speed for new suppliers.

Industry Chain Analysis

The upstream chain includes GaN epitaxy, silicon or alternative substrates, wafer processing, metals and packaging materials, and supporting driver and control ICs. The midstream combines GaN IDMs, fabless device designers, foundry partners, and outsourced assembly and test providers to manufacture discrete devices, power stages, and integrated power ICs. Downstream, these components enter server PSU, power-module, and power-architecture manufacturers before being deployed in AI servers and rack systems across cloud, colocation, enterprise, telecom, and research data centers. Value creation is increasingly shifting from transistor-level figures of merit toward co-optimization of device, driver, package thermal path, PCB layout, control, and reference design, especially in high-power-density platforms.

Segment Insights

By voltage and product form, 650 V discrete devices and driver-integrated power stages currently form the core of the high-voltage market, particularly in high-frequency LLC and related conversion stages. Low-voltage 100–150 V GaN is growing faster in 48 V bus conversion where current density and switching frequency are critical. Integrated GaN power stages and power ICs are gaining share because integrated drivers, protection, and sensing reduce parasitics and design complexity. Higher-voltage GaN remains an emerging segment but has increasing strategic relevance as 800 V DC architectures develop.

Downstream Market Opportunities

Hyperscale cloud data centers are the strongest demand source because procurement decisions place heavy weight on rack power, energy efficiency, serviceability, and secure high-volume supply. Colocation operators are another growth channel as AI compute leasing drives denser cabinets and higher power per rack. Enterprise, telecom, government, and research deployments are adopting at a steadier pace with greater emphasis on reliability and lifecycle cost. Suppliers that can address both high-voltage PSU stages and 48 V-class conversion while providing complete reference designs are

better positioned for large power-platform qualifications.

Regional Insights

North America is one of the most concentrated demand centers for AI servers and hyperscale data-center construction and is an early driver of high-power CRPS/OCP supplies and emerging 800 V architectures. Asia-Pacific has a strong manufacturing position across GaN wafer processing, packaging, server PSU ODMs, and AI server system supply chains, with China, Japan, South Korea, and Taiwan serving as major production hubs. Europe is smaller in downstream volume but remains important in power-semiconductor technology, specialized GaN suppliers, and high-efficiency power-conversion engineering.

Competitive Landscape Analysis

Competition is developing between diversified power-semiconductor vendors and specialist GaN suppliers. Large integrated vendors leverage wafer manufacturing, packaging, driver and controller portfolios, reference designs, and global account support, while focused GaN companies compete through lower on-resistance, greater integration, proprietary thermal packages, and high-frequency system expertise. As AI PSU customers move from evaluating individual transistors toward validating complete power-stage efficiency, thermals, EMI, reliability, and manufacturability, competitive advantage increasingly depends on system-level engineering support, production consistency, qualification track record, and long-term supply capability rather than device specifications alone.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “GaN Power Devices for AI Server Power Supplies Industry Forecast” looks at past sales and reviews total world GaN Power Devices for AI Server Power Supplies sales in 2025, providing a comprehensive analysis by region and market sector of projected GaN Power Devices for AI Server Power Supplies sales for 2026 through 2032. With GaN Power Devices for AI Server Power Supplies sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world GaN Power Devices for AI Server Power Supplies industry.

This Insight Report provides a comprehensive analysis of the global GaN Power Devices for AI Server Power Supplies landscape and highlights key trends related to

product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on GaN Power Devices for AI Server Power Supplies portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global GaN Power Devices for AI Server Power Supplies market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for GaN Power Devices for AI Server Power Supplies and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global GaN Power Devices for AI Server Power Supplies.

This report presents a comprehensive overview, market shares, and growth opportunities of GaN Power Devices for AI Server Power Supplies market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Discrete GaN FETs

Integrated GaN Power Stages

GaN Power ICs

Segmentation by Voltage Rating:

<150 V

151–650 V

651–1200 V

>1200 V

Segmentation by On-Resistance:

<20 mΩ

>20–50 mΩ

>50–100 mΩ

>100 mΩ

Segmentation by Application:

Cloud and Colocation

Government and Research

Telecom

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered

from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Infineon Technologies

Navitas Semiconductor

Innoscence

Renesas Electronics

Texas Instruments

Nexperia

ROHM

STMicroelectronics

Efficient Power Conversion

Cambridge GaN Devices

Power Integrations

Alpha and Omega Semiconductor

Wise Integration

Key Questions Addressed in this Report

What is the 10-year outlook for the global GaN Power Devices for AI Server Power Supplies market?

What factors are driving GaN Power Devices for AI Server Power Supplies market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do GaN Power Devices for AI Server Power Supplies market opportunities vary by end market size?

How does GaN Power Devices for AI Server Power Supplies break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

2.1.1 Global GaN Power Devices for AI Server Power Supplies Annual Sales 2021-2032

2.1.2 World Current & Future Analysis for GaN Power Devices for AI Server Power Supplies by Geographic Region, 2021, 2025 & 2032

2.1.3 World Current & Future Analysis for GaN Power Devices for AI Server Power Supplies by Country/Region, 2021, 2025 & 2032

2.2 GaN Power Devices for AI Server Power Supplies Segment by Type

2.2.1 Discrete GaN FETs

2.2.2 Integrated GaN Power Stages

2.2.3 GaN Power ICs

2.2.4 GaN Power Devices for AI Server Power Supplies Sales by Type

2.2.4.1 Global GaN Power Devices for AI Server Power Supplies Sales Market Share by Type (2021-2026)

2.2.4.2 Global GaN Power Devices for AI Server Power Supplies Revenue and Market Share by Type (2021-2026)

2.2.4.3 Global GaN Power Devices for AI Server Power Supplies Sale Price by Type (2021-2026)

2.3 GaN Power Devices for AI Server Power Supplies Segment by Voltage Rating

2.3.1 <150 V

2.3.2 151–650 V

2.3.3 651–1200 V

2.3.4 >1200 V

2.3.5 GaN Power Devices for AI Server Power Supplies Sales by Voltage Rating

2.3.5.1 Global GaN Power Devices for AI Server Power Supplies Sales Market Share by Voltage Rating (2021-2026)

2.3.5.2 Global GaN Power Devices for AI Server Power Supplies Revenue and Market Share by Voltage Rating (2021-2026)

2.3.5.3 Global GaN Power Devices for AI Server Power Supplies Sale Price by Voltage Rating (2021-2026)

2.4 GaN Power Devices for AI Server Power Supplies Segment by On-Resistance

2.4.1 <20 mΩ

2.4.2 >20–50 mΩ

2.4.3 >50–100 mΩ

2.4.4 >100 mΩ

2.4.5 GaN Power Devices for AI Server Power Supplies Sales by On-Resistance

2.4.5.1 Global GaN Power Devices for AI Server Power Supplies Sales Market Share by On-Resistance (2021-2026)

2.4.5.2 Global GaN Power Devices for AI Server Power Supplies Revenue and Market Share by On-Resistance (2021-2026)

2.4.5.3 Global GaN Power Devices for AI Server Power Supplies Sale Price by On-Resistance (2021-2026)

2.5 GaN Power Devices for AI Server Power Supplies Segment by Application

2.5.1 Cloud and Colocation

2.5.2 Government and Research

2.5.3 Telecom

2.5.4 Others

2.5.5 GaN Power Devices for AI Server Power Supplies Sales by Application

2.5.5.1 Global GaN Power Devices for AI Server Power Supplies Sale Market Share by Application (2021-2026)

2.5.5.2 Global GaN Power Devices for AI Server Power Supplies Revenue and Market Share by Application (2021-2026)

2.5.5.3 Global GaN Power Devices for AI Server Power Supplies Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global GaN Power Devices for AI Server Power Supplies Breakdown Data by Company

3.1.1 Global GaN Power Devices for AI Server Power Supplies Annual Sales by Company (2021-2026)

3.1.2 Global GaN Power Devices for AI Server Power Supplies Sales Market Share by Company (2021-2026)

3.2 Global GaN Power Devices for AI Server Power Supplies Annual Revenue by Company (2021-2026)

3.2.1 Global GaN Power Devices for AI Server Power Supplies Revenue by Company (2021-2026)

3.2.2 Global GaN Power Devices for AI Server Power Supplies Revenue Market Share by Company (2021-2026)

3.3 Global GaN Power Devices for AI Server Power Supplies Sale Price by Company

3.4 Key Manufacturers GaN Power Devices for AI Server Power Supplies Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers GaN Power Devices for AI Server Power Supplies Product Location Distribution

3.4.2 Players GaN Power Devices for AI Server Power Supplies Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR GAN POWER DEVICES FOR AI SERVER POWER SUPPLIES BY GEOGRAPHIC REGION

4.1 World Historic GaN Power Devices for AI Server Power Supplies Market Size by Geographic Region (2021-2026)

4.1.1 Global GaN Power Devices for AI Server Power Supplies Annual Sales by Geographic Region (2021-2026)

4.1.2 Global GaN Power Devices for AI Server Power Supplies Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic GaN Power Devices for AI Server Power Supplies Market Size by Country/Region (2021-2026)

4.2.1 Global GaN Power Devices for AI Server Power Supplies Annual Sales by Country/Region (2021-2026)

4.2.2 Global GaN Power Devices for AI Server Power Supplies Annual Revenue by Country/Region (2021-2026)

4.3 Americas GaN Power Devices for AI Server Power Supplies Sales Growth

4.4 APAC GaN Power Devices for AI Server Power Supplies Sales Growth

4.5 Europe GaN Power Devices for AI Server Power Supplies Sales Growth

4.6 Middle East & Africa GaN Power Devices for AI Server Power Supplies Sales Growth

5 AMERICAS

5.1 Americas GaN Power Devices for AI Server Power Supplies Sales by Country

5.1.1 Americas GaN Power Devices for AI Server Power Supplies Sales by Country (2021-2026)

5.1.2 Americas GaN Power Devices for AI Server Power Supplies Revenue by Country (2021-2026)

5.2 Americas GaN Power Devices for AI Server Power Supplies Sales by Type (2021-2026)

5.3 Americas GaN Power Devices for AI Server Power Supplies Sales by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC GaN Power Devices for AI Server Power Supplies Sales by Region

6.1.1 APAC GaN Power Devices for AI Server Power Supplies Sales by Region (2021-2026)

6.1.2 APAC GaN Power Devices for AI Server Power Supplies Revenue by Region (2021-2026)

6.2 APAC GaN Power Devices for AI Server Power Supplies Sales by Type (2021-2026)

6.3 APAC GaN Power Devices for AI Server Power Supplies Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe GaN Power Devices for AI Server Power Supplies by Country

7.1.1 Europe GaN Power Devices for AI Server Power Supplies Sales by Country

(2021-2026)

7.1.2 Europe GaN Power Devices for AI Server Power Supplies Revenue by Country

(2021-2026)

7.2 Europe GaN Power Devices for AI Server Power Supplies Sales by Type

(2021-2026)

7.3 Europe GaN Power Devices for AI Server Power Supplies Sales by Application

(2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa GaN Power Devices for AI Server Power Supplies by Country

8.1.1 Middle East & Africa GaN Power Devices for AI Server Power Supplies Sales by Country (2021-2026)

8.1.2 Middle East & Africa GaN Power Devices for AI Server Power Supplies Revenue by Country (2021-2026)

8.2 Middle East & Africa GaN Power Devices for AI Server Power Supplies Sales by Type (2021-2026)

8.3 Middle East & Africa GaN Power Devices for AI Server Power Supplies Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of GaN Power Devices for AI Server Power Supplies

10.3 Manufacturing Process Analysis of GaN Power Devices for AI Server Power Supplies

10.4 Industry Chain Structure of GaN Power Devices for AI Server Power Supplies

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 GaN Power Devices for AI Server Power Supplies Distributors

11.3 GaN Power Devices for AI Server Power Supplies Customer

12 WORLD FORECAST REVIEW FOR GAN POWER DEVICES FOR AI SERVER POWER SUPPLIES BY GEOGRAPHIC REGION

12.1 Global GaN Power Devices for AI Server Power Supplies Market Size Forecast by Region

12.1.1 Global GaN Power Devices for AI Server Power Supplies Forecast by Region (2027-2032)

12.1.2 Global GaN Power Devices for AI Server Power Supplies Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global GaN Power Devices for AI Server Power Supplies Forecast by Type (2027-2032)

12.7 Global GaN Power Devices for AI Server Power Supplies Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Infineon Technologies

13.1.1 Infineon Technologies Company Information

13.1.2 Infineon Technologies GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.1.3 Infineon Technologies GaN Power Devices for AI Server Power Supplies Sales,

Revenue, Price and Gross Margin (2021-2026)

13.1.4 Infineon Technologies Main Business Overview

13.1.5 Infineon Technologies Latest Developments

13.2 Navitas Semiconductor

13.2.1 Navitas Semiconductor Company Information

13.2.2 Navitas Semiconductor GaN Power Devices for AI Server Power Supplies

Product Portfolios and Specifications

13.2.3 Navitas Semiconductor GaN Power Devices for AI Server Power Supplies

Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Navitas Semiconductor Main Business Overview

13.2.5 Navitas Semiconductor Latest Developments

13.3 Innoscience

13.3.1 Innoscience Company Information

13.3.2 Innoscience GaN Power Devices for AI Server Power Supplies Product

Portfolios and Specifications

13.3.3 Innoscience GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Innoscience Main Business Overview

13.3.5 Innoscience Latest Developments

13.4 Renesas Electronics

13.4.1 Renesas Electronics Company Information

13.4.2 Renesas Electronics GaN Power Devices for AI Server Power Supplies Product

Portfolios and Specifications

13.4.3 Renesas Electronics GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.4.4 Renesas Electronics Main Business Overview

13.4.5 Renesas Electronics Latest Developments

13.5 Texas Instruments

13.5.1 Texas Instruments Company Information

13.5.2 Texas Instruments GaN Power Devices for AI Server Power Supplies Product

Portfolios and Specifications

13.5.3 Texas Instruments GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.5.4 Texas Instruments Main Business Overview

13.5.5 Texas Instruments Latest Developments

13.6 Nexperia

13.6.1 Nexperia Company Information

13.6.2 Nexperia GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.6.3 Nexperia GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.6.4 Nexperia Main Business Overview

13.6.5 Nexperia Latest Developments

13.7 ROHM

13.7.1 ROHM Company Information

13.7.2 ROHM GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.7.3 ROHM GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.7.4 ROHM Main Business Overview

13.7.5 ROHM Latest Developments

13.8 STMicroelectronics

13.8.1 STMicroelectronics Company Information

13.8.2 STMicroelectronics GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.8.3 STMicroelectronics GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.8.4 STMicroelectronics Main Business Overview

13.8.5 STMicroelectronics Latest Developments

13.9 Efficient Power Conversion

13.9.1 Efficient Power Conversion Company Information

13.9.2 Efficient Power Conversion GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.9.3 Efficient Power Conversion GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.9.4 Efficient Power Conversion Main Business Overview

13.9.5 Efficient Power Conversion Latest Developments

13.10 Cambridge GaN Devices

13.10.1 Cambridge GaN Devices Company Information

13.10.2 Cambridge GaN Devices GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.10.3 Cambridge GaN Devices GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.10.4 Cambridge GaN Devices Main Business Overview

13.10.5 Cambridge GaN Devices Latest Developments

13.11 Power Integrations

13.11.1 Power Integrations Company Information

13.11.2 Power Integrations GaN Power Devices for AI Server Power Supplies Product

Portfolios and Specifications

13.11.3 Power Integrations GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.11.4 Power Integrations Main Business Overview

13.11.5 Power Integrations Latest Developments

13.12 Alpha and Omega Semiconductor

13.12.1 Alpha and Omega Semiconductor Company Information

13.12.2 Alpha and Omega Semiconductor GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.12.3 Alpha and Omega Semiconductor GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.12.4 Alpha and Omega Semiconductor Main Business Overview

13.12.5 Alpha and Omega Semiconductor Latest Developments

13.13 Wise Integration

13.13.1 Wise Integration Company Information

13.13.2 Wise Integration GaN Power Devices for AI Server Power Supplies Product Portfolios and Specifications

13.13.3 Wise Integration GaN Power Devices for AI Server Power Supplies Sales, Revenue, Price and Gross Margin (2021-2026)

13.13.4 Wise Integration Main Business Overview

13.13.5 Wise Integration Latest Developments
