The global Gantry Frame Hydraulic Press market size is predicted to grow from US\$ 1123 million in 2025 to US\$ 1879 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

In 2025, global sales of gantry frame hydraulic presses reached 6,200 units, with an average selling price of US\$185,000. Gantry frame hydraulic presses are heavy-duty forming equipment that uses a four-column or frame-type gantry structure and a hydraulic system to provide forming force. They are characterized by uniform force distribution, high rigidity, large working space, and strong stability. They are mainly used for metal sheet stretching, compression molding, hot pressing of composite materials, powder forming, and shaping of large structural parts. Its upstream raw materials mainly include medium and heavy plate steel, hydraulic cylinders, hydraulic pumps and valves, servo motors, electrical control systems and seals. On average, each unit consumes about 22 tons of steel, 480 kg of hydraulic components, and 160 kg of electrical control components. Downstream, it mainly supplies automobile and auto parts, aerospace, rail transportation, construction machinery and composite material product manufacturers. Among them, automobiles and new energy account for 45%, construction machinery accounts for 25%, and aerospace and others account for 30%. The global total capacity is about 11,000 units/year, and the industry gross profit margin is about 25%-35%. In terms of downstream consumption, new production lines and capacity expansion account for 60%, and equipment upgrades and renovations account for 40%. The future way out lies in upgrading to large tonnage, servo hydraulics, intelligent control and flexible production. Driven by automotive lightweighting, the expansion of composite material applications and the domestic substitution of high-end equipment, the demand for gantry frame hydraulic presses is steadily growing, and there is a business opportunity for continuous expansion in the mid-to-high-end market.

United States market for Gantry Frame Hydraulic Press is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
