According to our LPI (LP Information) latest study, the global Garden and Lawn Tools market size was valued at US\$ 8280.6 million in 2023. With growing demand in downstream market, the Garden and Lawn Tools is forecast to a readjusted size of US\$ 13530 million by 2030 with a CAGR of 7.3% during review period.

The research report highlights the growth potential of the global Garden and Lawn Tools market. Garden and Lawn Tools are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Garden and Lawn Tools. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Garden and Lawn Tools market.

A garden tool is any one of many tools made for gardens and gardening and overlaps with the range of tools made for agriculture and horticulture.

In terms of revenue, the lawn mowers segment dominated the market and will continue to lead the market in the coming years. Gas-powered lawn mowers are useful for mowing large lawns and gardens as these do not have an electric cord. Although the gas-powered lawn mowers segment currently dominates the market, their sales are gradually decreasing with increasing consumer awareness of the adverse impact of these mowers on the environment. The introduction of battery-powered and hybrid lawn mowers will contribute to this segment's growth in the market.
