The global Gardening Franchise market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

A gardening franchise is a business model where a company grants individuals or entrepreneurs the right to operate a gardening business under their established brand name and with their support and guidance. The franchisee pays an initial fee and ongoing royalties to the franchisor in exchange for the use of their brand, marketing materials, training, and ongoing support.

Gardening franchises typically provide services such as landscaping, lawn care, garden maintenance, tree and shrub care, irrigation system installation, and other related services. Franchisees benefit from the established brand recognition, proven business model, and support from the franchisor, while the franchisor expands their business through the network of franchisees.

Franchisees are responsible for managing their own business operations, hiring and training employees, marketing and sales, and providing quality gardening services to customers. The franchisor may provide initial training, ongoing support, marketing materials, and access to preferred suppliers or equipment.

Gardening franchises can be a lucrative opportunity for individuals who have a passion for gardening and landscaping and want to start their own business with the support and guidance of an established brand.
