The gallium wafers are made from several constituents such as silicon, n-type gallium phosphate or n-type gallium nitride. Silicon wafers are manufactured by using thin-film deposition method and gallium nitride wafers are manufactured through roll-to-roll process. In both types, the wafer material is deposited with certain gallium nitride or silica flakes. The Gallium Antimonide Wafers Applications has evolved to include the most up-to-date technology with the use of highly advanced technologies like infrared detectors, lasers, thermocouple sensors and many others. It is also equipped with several software applications including the Automatic Identification Function System (AIFS) and the Automatic Identification System (AIS). The main features of gallium antimonide wafers are its broad absorption spectrum that enables the detectors to easily detect even a single molecule and its wide frequency response that enables it to be used for different applications. It also has the best possible energy efficiency, the lowest power consumption and the highest sensitivity.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent

growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
