The global Gel Batteries market size is predicted to grow from US\$ 4219 million in 2025 to US\$ 9313 million in 2031; it is expected to grow at a CAGR of 14.1% from 2025 to 2031.

A Gel battery design is typically a modification of the standard lead-acid automotive or marine battery. A gelling agent is added to the electrolyte to reduce movement inside the battery case. Many gel batteries also use one-way valves in place of open vents, which help the normal internal gasses to recombine back into water in the battery, reducing gassing. Generally, gel batteries are less tolerant of high heat and are charged at lower power than traditional or AGM batteries.

North America is the largest market with about 23% revenue market share. Followed by China and Korea, accounting for about 35% revenue market share.

The key players are EXIDE, EnerSys, C&D Technologies, East Penn, Trojan, FIAMM, SEC, Hoppecke, DYNAVOLT, LEOCH, Coslight, HUAUFU, VISION, Shoto, Sacred Sun, FENGFAN etc. Top 3 companies occupied about 39% revenue market share.
