Germanium stone is a mineral-containing material enriched with the element germanium, known for its ability to emit far-infrared rays and generate negative ions when in contact with body heat. Commonly used in wellness products like bracelets, massage tools, and heated therapy mats, it is believed to promote blood circulation, reduce fatigue, and enhance overall well-being. While germanium's physical properties are real, especially its semi-conductive and infrared-emitting nature, many of the health claims associated with germanium stone are not scientifically proven and should be considered with caution.
