Glass Cord is a reinforcing cord processed with a special adhesive and used in rubber and plastic products. Other cords are also available utilising, Carbon Fiber Cord, Aramid Fiber Cord, and other high-performance fibers. This reinforcing material has excellent flexibility and dimensional stability. It combines cord design that takes advantage of the mechanical properties of fibers with a form of adhesive treatment that has a strong affinity with the rubber or resin to be reinforced. This enables us to offer new functionality and value in the field of rubber and resin products, such as providing high strength, high elasticity, high durability, environmental resistance, low elongation and low creep elongation.

Major glass cord players in the world include NSG, SILTEX, Central Glass Co., Ltd. Etc. The top three global players by revenue account for nearly 90 per cent. Japan is the world's largest market with about 44 per cent, followed by Europe with about 22 per
