The global Glass Lined Header market size is predicted to grow from US$ 49.04 million in 2025 to US$ 82.06 million in 2032; it is expected to grow at a CAGR of 7.8% from 2026 to 2032.

A Glass Lined Header is a manifold-type piping component whose internal wetted surfaces are coated with a fused glass enamel, combining the mechanical strength of steel with the corrosion resistance of glass. Functionally it serves as a common trunk line that distributes or collects process fluids from multiple branch connections. The glass lining is fired at high temperature onto a carbon-steel or stainless-steel shell, providing a chemically inert, easy-to-clean surface for aggressive acids, solvents and other corrosive media, while the header geometry is customized to match plant layout and process hydraulics.

Upstream, glass lined headers rely on suppliers of pressure-grade steel pipes or forgings (for the header body and nozzles), quality flanges and fittings, and enamel frit producers specialized in chemical-resistant glass formulations. Fabrication typically involves cutting, forming and welding the header shell and branch connections, followed by surface preparation (shot-blasting), enamel spraying and repeated firing cycles in a furnace similar to those used for glass-lined pipes and vessels.

Downstream, glass lined headers are installed in glass-lined piping systems that connect reactors, columns, condensers, receivers and heat exchangers in chemical, pharmaceutical, agrochemical and specialty materials plants. They act as distribution or collection nodes—for example, feeding several glass-lined reactors from a common acid header, or collecting product from multiple crystallizers into a transfer line—while maintaining a fully glass-lined corrosion-resistant flow path.

In 2024, global sales of Glass Lined Header reached approximately 43 K units, with an

average global market price of around US$ 1,080/unit. Production capacity varies significantly among manufacturers, with gross profit margins ranging from approximately 30% to 45%.
