The global Glass Mat Gypsum Panels market size is predicted to grow from US\$ 5380 million in 2025 to US\$ 8045 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global Glass Mat Gypsum Panels production reached approximately 1 billion Sq.m, average price 5.5 USD/Sq.m.

Glass Mat Gypsum Panels (also referred to as glass mat gypsum sheathing or boards) are high-performance building materials engineeringly distinguished by replacing the conventional cellulose-based paper facers of standard drywall with coated fiberglass mats (glass mats) on both front and back surfaces and long edges. The interior structure comprises a non-combustible, moisture-resistant gypsum core often enhanced with water-repellent additives, anti-microbial agents, and glass fiber reinforcements (such as Type X formulations). Because the inorganic fiberglass facers are naturally hydrophobic and non-combustible, these panels eliminate the structural vulnerabilities of traditional paper-faced drywall?such as water absorption, warping, sagging, and mold propagation when exposed to moisture or severe weather. Manufactured in accordance with rigorous industry compliance standards such as ASTM C1177, these panels deliver exceptional weather protection, high impact resistance, and dimensional stability, rendering them the premier choice as exterior commercial sheathing under claddings, commercial roofing substrates (coverboards), and tile-backer substrates in high-humidity tile environments like commercial showers and basements.

The consumption market for Glass Mat Gypsum Panels is deeply integrated into global light-gauge steel and wood-frame construction methodologies, with geographic distribution strictly dictated by building codes and regional climate dynamics. North

America (primarily the U.S. and Canada) stands as the absolute heavyweight in global consumption. Due to the omnipresence of framed construction, the high frequency of severe weather events (such as hurricanes and heavy precipitation), and rigid ASTM mandates specifying mold and moisture management, these panels are universally utilized as exterior sheathing and commercial roofing coverboards across nearly all commercial projects. Europe represents the second-largest market, with demand fueled by stringent European green building certifications (e.g., LEED, BREEAM) that emphasize long-term material durability and energy efficiency. Meanwhile, the Asia-Pacific region is emerging as the most dynamic growth market; despite a preference for reinforced concrete structures, the rising implementation of premium moisture-proofing and fire-safety standards in luxury hotels, Grade-A office towers, data centers, and high-humidity interior zones (such as commercial basements and wet rooms) across China, Japan, and Southeast Asia is driving rapid adoption. Regarding profit margins, glass mat gypsum panels represent a high-premium, high-margin category within the building materials sector, serving as a lucrative alternative to standard paper-faced drywall. While conventional drywall suffers from intense commodity price wars and overcapacity, capping gross margins at a modest 15% to 25%, glass mat variations offer vastly superior profitability. Attributed to proprietary formulations of coated fiberglass mats, complex anti-microbial core treatments, and formidable brand-technical moats established by industry oligopolies (such as Georgia-Pacific's DensGlass line, CertainTeed, and USG), these specialized products command substantial pricing leverage. Consequently, they yield robust gross profit margins ranging from 35% to 50%, maintaining highly resilient profitability even amidst fluctuating raw material cycles for gypsum and fiberglass.

United States market for Glass Mat Gypsum Panels is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Glass Mat Gypsum Panels is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Glass Mat Gypsum Panels is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Glass Mat Gypsum Panels players cover Saint-Gobain, Knauf, PABCO Gypsum, Gypsemna, Georgia-Pacific, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
