Global Glass Recycling Market 2019 by Manufacturers, Countries, Type and Application, Forecast to 2024

Glass Recycling is the processing of waste glass into usable products. Glass waste should be separated by chemical composition, and then, depending on the end use and local processing capabilities, might also have to be separated into different colors. When glass is used for new container manufacturing, it is virtually infinitely recyclable. The processing and use of recycled glass in manufacturing conserves raw materials, and reduces energy consumption. That which is not recycled, but crushed, reduces the volume of waste sent to landfills.

The major players in global Glass Recycling market include Strategic Materials, Ardagh, Shanghai Yanlongji, etc. The top 3 players occupy about 10% shares of the global market. Asia-Pacific and Europe are main markets, they occupy about 75% of the global market. Construction Glass is the main type, with a share about 60%. Construction is the main application, which holds a share about 60%.
