The Glassboard Marker represents an advanced evolution in dry-erase technology, specifically engineered for non-porous surfaces including tempered glass, ceramic tiles, and high-gloss whiteboards. These markers utilize specially formulated alcohol-based inks containing nano-pigments that deliver exceptional opacity (up to 98% coverage) while maintaining effortless erasability. The innovative tip design incorporates dual-density felt or porous ceramic nibs that ensure consistent ink flow (0.5-1.2mm line width) without skipping, even at acute writing angles. Premium formulations feature UV-resistant components and anti-evaporation technology that extends uncapped usability to 72+ hours. Industrial-grade variants meet ISO 14145-2 standards for chemical stability and are certified for use in cleanroom environments (Class 100-1000).
