The report requires updating with new data and is sent in 48 hours after order is placed.

It is very difficult to measure the on-line pH value in the reaction vessel in the glass lined reaction instrument. The glass lined pH value system can well and safely measure the pH value in the glass lined reaction vessel. The detector is installed on the enamel probe carrier and has two forms: tube and ring. At present, the market of this kind of equipment is vacant and there are few manufacturers, so it has great development potential.
