Glyceryl Stearate SE (GMSE) is the vegetable derived glyceryl ester from stearic acid (glycerin and tripple pressed stearic acid) combined with potassium stearate (potassium salts).

Glyceryl Stearate SE (GMSE) is a self emulsifier, of vegetable origin, that offers several key benefits in natural bath, body and skin care systems. Due to the combination of the glyceryl esters, and the potassium salts, it offers the ability to form lamellar liquid crystalline and / or crystalline gel phases when formulated with high water content.

Functions as a anionic opacifier, formulation stabilizer, bodifying agent, emulsifier in high water formulations, co-emulsifier in low water formulations.
