It is rich in proteins, minerals and vitamins, which nourish and fortify skin tissues, and are used to re-condition the skin, improve suppleness and prevent over drying. It also strengthens and refines fine lines. Soja Protein is also used for its protection and prevention abilities. It has a high-moisturization factor assisting in the fight against aging. Since Glycine Soja Protein is an antioxidant and MMPI (Matrix Metallpoprotease Inhibitor) it helps defend against skin aging by inhibiting skin matrix breakdown. It supports the function of fibroblasts, and reduces inflammation and irritations caused by UV exposure and other environmental stresses, which cause the breakdown of collagen and elastin in the dermal matrix via collagenase and elastase (MMPs). Glycine Soja is also noted for its anti-wrinkle, smoothing and moisturizing properties. It is an extremely effective moisturizer, protecting the skin from excessive dryness, particularly during the winter months. Since Glycine Soja Protein is easily absorbed by the skin it also assists in the absorption of other vital nutrients.
