## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Glycogen Assay kit provides a simple, fast and robust way to measure Glycogen levels in various biological samples. This assay is suitable for measuring Glycogen levels in samples that contain reducing substances, which may interfere with the oxidase-based assays. In this assay, Glycogen is hydrolyzed into glucose, which is oxidized to form an intermediate that reduces a colorless Probe to a colored product with strong absorbance at 450 nm. This high-throughput suitable assay kit can detect less than 4 µg/ml of Glycogen in samples.
