Abstracts

The global GMP Cell Culture Custom Service market size is predicted to grow from US\$ 4852 million in 2025 to US\$ 7374 million in 2032; it is expected to grow at a CAGR of 6.2% from 2026 to 2032.

GMP cell culture custom service is a type of professional contract service provided by CDMOs, CMOs, biopharmaceutical manufacturing platforms, and cell therapy manufacturing organizations. It is tailored to the product, cell line, clinical stage, and quality system requirements of pharmaceutical and biotechnology clients. Services include cell line establishment and screening, master cell bank and working cell bank establishment, culture condition and medium adaptation, upstream cell culture process development, process optimization, scale-up, and technology transfer, as well as cell culture, expansion, and clinical or commercial manufacturing that meets GMP/cGMP requirements.

Key Findings

Mammalian cells and immune cells constitute the two cell-type categories of GMP Cell Culture Custom Service

Single-batch culture scale is segmented into ≤10 L and >10 L

Adherent and suspension processes represent the two core culture-system configurations

Process reproducibility scale-up and GMP technology transfer are central commercial capabilities

Gene therapy biopharmaceuticals and vaccine programs form the principal application groups

Market Trends

GMP Cell Culture Custom Service is shifting toward integrated development-to-manufacturing platforms that connect cell-line or starting-cell preparation, upstream process development, analytical support, scale-up, technology transfer and GMP production within a unified quality framework. In mammalian-cell manufacturing, suspension culture remains a major route for scalable biologics production, supported by fed-batch, intensified and perfusion processes, while single-use bioreactors are increasing flexibility across clinical and commercial stages. WuXi Biologics has demonstrated suspension-adapted HEK293 platforms scalable to 1,000 L perfusion and 2,000 L fed-batch manufacturing, while Samsung Biologics and Lonza operate cGMP mammalian production at substantially larger commercial scales. Adherent culture remains relevant for selected viral-vector, vaccine and other cell-dependent processes, and suppliers are increasingly developing pathways to migrate appropriate processes toward scalable suspension or intensified configurations. Immune-cell programs are following a parallel path toward closed processing, automation, standardized expansion and stronger control of cell identity and viability. The long-term direction is therefore toward flexible platforms capable of supporting both ≤ 10 L development or specialized batches and ≥ 10 L clinical and commercial manufacturing with consistent analytical and quality control.

Market Dynamics

Drivers

The principal driver of GMP Cell Culture Custom Service is the expanding technical complexity of biologics, gene therapy, vaccine and cell-based development programs. Mammalian cells are widely used to produce antibodies, recombinant proteins and other structurally complex biologics, while HEK293 and related cell systems are important in viral-vector and vaccine development. Immune-cell programs require specialized expansion and handling capabilities that many developers do not maintain internally. Outsourcing gives customers access to qualified cleanroom infrastructure, experienced process-development teams, analytical laboratories, validated quality systems and GMP manufacturing without establishing equivalent facilities themselves. Another important driver is the transition from development scale to regulated production. Cell growth,

productivity, product quality and viability must remain controlled as processes move from laboratory vessels into larger bioreactors or manufacturing suites, making scale-up expertise and technology-transfer discipline commercially important. Leading providers increasingly connect cell-line development, process development, analytical testing and GMP production to reduce handoffs and preserve process knowledge across development stages.

Restraints

Market development is constrained by biological variability, demanding GMP requirements and the difficulty of transferring cell-culture processes across equipment scales. Cell performance can change with media composition, passage history, oxygen transfer, shear stress, mixing, temperature and nutrient gradients, so a process established at small scale may require substantial optimization before larger-scale manufacturing. Adherent systems can become operationally complex as required culture surface area increases, while suspension systems demand robust bioreactor control and reproducible high-density growth. Immune-cell programs create additional variability because starting materials and critical cell attributes can differ between batches. GMP execution also requires qualified facilities, environmental monitoring, trained operators, analytical release testing, data integrity and extensive documentation. Specialized production suites therefore carry significant fixed costs, while early-stage customer programs may have uncertain schedules or changing batch requirements. These factors can constrain capacity utilization and make flexible manufacturing design an important economic consideration.

Opportunities

The strongest opportunities lie in scalable suspension culture, intensified processing, flexible single-use systems, immune-cell manufacturing and integrated gene-therapy workflows. For mammalian programs, improvements in cell-line productivity, high-cell-density culture, perfusion and single-use bioreactors can raise output while allowing capacity to be adjusted more flexibly between clinical and commercial campaigns. AGC Biologics uses single-use mammalian systems across a range of production scales, while WuXi Biologics has developed both adherent and suspension processes for viral vaccines and scalable HEK293 platforms for difficult-to-express molecules. Gene-therapy programs create further opportunities because cell cultivation can be integrated with plasmid, AAV, lentiviral-vector and downstream processing services. ProBio operates both adherent and suspension GMP lentiviral-vector processes, demonstrating how culture-system flexibility can support different development stages. Immune-cell manufacturing provides another specialized opportunity where controlled expansion,

closed processing and multi-suite GMP operations are important. Providers that can support ?10 L development and specialized batches while retaining a pathway into ?10 L production can capture a larger portion of the customer lifecycle.

Challenges

The main long-term challenge is maintaining biological and process consistency as products move between scales, sites and development stages. Changes in vessel geometry, mixing, oxygen transfer and cell density can influence growth kinetics and product characteristics, requiring scientifically justified scale-up and comparability strategies. Immune-cell production adds further complexity because identity, phenotype, viability and potency must be preserved while starting material may vary. Service providers also need to accommodate different customer cell lines, media, vectors, analytical methods and release specifications without compromising cross-contamination controls or quality-system consistency. Capacity planning is another challenge: commercial mammalian biologics can favor larger production assets, whereas early gene-therapy, vaccine and immune-cell programs may require smaller and more flexible suites. The ability to balance equipment utilization, rapid scheduling, trained personnel and validated processes therefore has a direct effect on service economics. As customers increasingly expect end-to-end support, providers must also manage technology transfer, analytical comparability, digital records and regulatory documentation across multiple functional teams and sites.

Industry Chain Analysis

The upstream industry chain of GMP Cell Culture Custom Service includes production cell lines and starting biological materials, master and working cell banks, culture media, feeds, cytokines and growth factors, single-use assemblies, bioreactors, cell-retention systems, microcarriers or fixed-bed equipment for selected adherent processes, filtration systems, sensors, process analytical technologies and supporting laboratory instruments. Mammalian-cell manufacturing commonly uses CHO and HEK-derived systems, while immune-cell programs require specialized activation, expansion and preservation inputs. Culture-system selection materially affects equipment architecture: suspension cells can generally be scaled through stirred bioreactors, while adherent cells require suitable surfaces, microcarriers, fixed-bed systems or related configurations. Single-use equipment is increasingly used because it can reduce changeover requirements and provide flexibility across multiple products, while large commercial biologics programs may also employ high-capacity stainless-steel assets.

The midstream creates value through process design, cell banking, culture optimization, scale-up, technology transfer, GMP cultivation, in-process testing, harvest, analytical development, quality control and regulatory documentation. Downstream applications include gene therapy, biopharmaceuticals, vaccine R&D and production, and other cell-dependent products. Commercial value is highest when the provider can maintain continuity from development into regulated manufacturing while preserving critical process parameters and product-quality attributes. Integrated service platforms can further connect cell culture with downstream purification, viral-vector manufacturing, analytical testing and fill-finish, reducing technical handoffs between organizations. Cost and margin structures are influenced by cleanroom utilization, bioreactor capacity, single-use consumables, media, quality-control testing, specialized personnel and project scheduling. Consequently, manufacturing flexibility and utilization management are central to service economics.

Segment Insights

By cell type, mammalian-cell GMP Cell Culture Custom Service supports a broad range of antibodies, recombinant proteins, viral products and other biologics, with commercial performance dependent on cell-line stability, productivity, product-quality attributes and scalable bioreactor operation. The segment spans small process-development systems through very large commercial manufacturing assets, giving it a broad scale profile. Immune-cell services follow a different production logic because the cultured cells themselves may represent a critical therapeutic component, placing greater emphasis on identity, phenotype, viability, controlled expansion and closed processing. GC Cell's capabilities across NK, T and stem-cell modalities illustrate the specialized process-development and manufacturing requirements associated with this category.

By single-batch culture scale, ?10 L projects are more closely associated with process development, early-stage material generation, immune-cell expansion, optimization studies and other applications that prioritize flexibility over volume. ?10 L manufacturing becomes increasingly important when programs progress into clinical supply, viral-vector production and commercial biologics, where scale-up reproducibility, manufacturing utilization and batch economics carry greater weight. By culture system, suspension processing provides a direct pathway toward stirred-tank scale-up and is widely used for mammalian production, while adherent culture remains technically important for selected viral-vector and vaccine processes. Official commercial platforms demonstrate that both approaches continue to coexist, with several providers offering adherent and suspension options according to the biology and development stage of the customer program.

Downstream Market Opportunities

Biopharmaceuticals provide a broad application base for GMP Cell Culture Custom Service because mammalian-cell platforms support antibodies, recombinant proteins, fusion proteins and other complex biologics requiring clinical and commercial production. Gene therapy expands demand through producer-cell cultivation and viral-vector manufacturing, with both adherent and suspension HEK293-derived processes used according to vector and scale requirements. Vaccine R&D and production create additional demand for adaptable cell substrates, batch, fed-batch, perfusion and adherent culture configurations. Across these applications, customers increasingly value providers capable of retaining programs from early development through GMP manufacturing because fewer transfers can reduce process re-establishment and comparability risk. The most attractive opportunities are therefore concentrated in integrated platforms that combine cell culture with analytical testing, quality management, viral-vector or downstream capabilities and a clear scale-up pathway from 10 L development work into 10 L manufacturing.

Regional Insights

North America and Europe have mature biopharmaceutical outsourcing ecosystems with extensive process-development, mammalian-cell manufacturing and advanced-therapy infrastructure. North American facilities support both flexible development programs and large-scale commercial biologics manufacturing; Lonza's Vacaville site, for example, operates 12,000 L and 25,000 L mammalian bioreactors for late-stage and commercial supply. Europe combines established biologics manufacturing with specialist viral-vector and cell-related capabilities, creating a diversified service base across conventional biologics and advanced modalities. These regions place substantial emphasis on regulatory track record, technology-transfer reliability and integrated analytical and quality support.

Asia has developed a broad and increasingly sophisticated GMP cell-culture service base. Samsung Biologics and WuXi Biologics operate scalable mammalian manufacturing networks, while South Korea also has specialized immune-cell capabilities through GC Cell. Japan is expanding mammalian and advanced-therapy capacity through participants such as AGC, whose Yokohama development includes mammalian and cell-therapy capabilities. China also has a growing group of domestic CDMO providers covering biologics and gene-therapy-related manufacturing. Regional differentiation increasingly depends on flexible scale, single-use technology, local regulatory execution, supply-chain resilience and the ability to support both

development-stage and commercial programs. No validated evidence in the current research base supports assigning a single region as the largest or fastest-growing market.

Competitive Landscape Analysis

The competitive landscape of GMP Cell Culture Custom Service combines large integrated biologics CDMOs, advanced-therapy specialists and regional development-and-manufacturing providers. Samsung Biologics competes through large-scale cGMP mammalian cell-culture capacity and clinical-to-commercial drug-substance manufacturing, while WuXi Biologics combines mammalian cell-line development, process development, analytical capabilities and scalable manufacturing. Lonza provides development-to-commercial mammalian manufacturing and cell-bank capabilities, and FUJIFILM, Boehringer Ingelheim, Thermo Fisher Scientific, AGC and other confirmed companies participate through established biopharmaceutical or advanced-therapy CDMO infrastructure. Specialist providers differentiate through narrower modalities and culture expertise: ProBio supports adherent and suspension GMP lentiviral-vector production, while GC Cell focuses on immune-cell and cell-and-gene-therapy manufacturing. Competitive differentiation centers on cell-line and process expertise, adherent and suspension capability, available batch scale, GMP capacity, analytical depth, technology-transfer reliability, regulatory execution, project scheduling and the ability to keep a program within one quality and manufacturing network from development through clinical or commercial supply.

Report Scope

LPI (LP Information)' newest research report, the “GMP Cell Culture Custom Service Industry Forecast” looks at past sales and reviews total world GMP Cell Culture Custom Service sales in 2025, providing a comprehensive analysis by region and market sector of projected GMP Cell Culture Custom Service sales for 2026 through 2032. With GMP Cell Culture Custom Service sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world GMP Cell Culture Custom Service industry.

This Insight Report provides a comprehensive analysis of the global GMP Cell Culture Custom Service landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on GMP Cell Culture Custom Service portfolios and capabilities, market entry strategies,

market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global GMP Cell Culture Custom Service market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for GMP Cell Culture Custom Service and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global GMP Cell Culture Custom Service.

This report presents a comprehensive overview, market shares, and growth opportunities of GMP Cell Culture Custom Service market by product type, application, key players and key regions and countries.

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global GMP Cell Culture Custom Service Market Size (2021-2032)
 - 2.1.2 GMP Cell Culture Custom Service Market Size CAGR by Region (2021 VS 2025 VS 2032)
 - 2.1.3 World Current & Future Analysis for GMP Cell Culture Custom Service by Country/Region (2021, 2025 & 2032)
- 2.2 GMP Cell Culture Custom Service Segment by Type
 - 2.2.1 Mammalian Cells
 - 2.2.2 Immune Cells
 - 2.2.3 GMP Cell Culture Custom Service Market Size by Type
 - 2.2.3.1 GMP Cell Culture Custom Service Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.3.2 Global GMP Cell Culture Custom Service Market Size Market Share by Type (2021-2026)
- 2.3 GMP Cell Culture Custom Service Segment by Batch Culture Scale
 - 2.3.1 ?10L
 - 2.3.2 ?10L
 - 2.3.3 GMP Cell Culture Custom Service Market Size by Batch Culture Scale
 - 2.3.3.1 GMP Cell Culture Custom Service Market Size CAGR by Batch Culture Scale (2021 VS 2025 VS 2032)
 - 2.3.3.2 Global GMP Cell Culture Custom Service Market Size Market Share by Batch Culture Scale (2021-2026)
- 2.4 GMP Cell Culture Custom Service Segment by Culture System
 - 2.4.1 Adherent Cells

2.4.2 Suspension Cells

2.4.3 GMP Cell Culture Custom Service Market Size by Culture System

2.4.3.1 GMP Cell Culture Custom Service Market Size CAGR by Culture System (2021 VS 2025 VS 2032)

2.4.3.2 Global GMP Cell Culture Custom Service Market Size Market Share by Culture System (2021-2026)

2.5 GMP Cell Culture Custom Service Segment by Application

2.5.1 Gene Therapy

2.5.2 Biopharmaceuticals

2.5.3 Vaccine R&D and Production

2.5.4 Other

2.5.5 GMP Cell Culture Custom Service Market Size by Application

2.5.5.1 GMP Cell Culture Custom Service Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.5.2 Global GMP Cell Culture Custom Service Market Size Market Share by Application (2021-2026)

3 GMP CELL CULTURE CUSTOM SERVICE MARKET SIZE BY PLAYER

3.1 GMP Cell Culture Custom Service Market Size Market Share by Player

3.1.1 Global GMP Cell Culture Custom Service Revenue by Player (2021-2026)

3.1.2 Global GMP Cell Culture Custom Service Revenue Market Share by Player (2021-2026)

3.2 Global GMP Cell Culture Custom Service Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 GMP CELL CULTURE CUSTOM SERVICE BY REGION

4.1 GMP Cell Culture Custom Service Market Size by Region (2021-2026)

4.2 Global GMP Cell Culture Custom Service Annual Revenue by Country/Region (2021-2026)

4.3 Americas GMP Cell Culture Custom Service Market Size Growth (2021-2026)

4.4 APAC GMP Cell Culture Custom Service Market Size Growth (2021-2026)

4.5 Europe GMP Cell Culture Custom Service Market Size Growth (2021-2026)

4.6 Middle East & Africa GMP Cell Culture Custom Service Market Size Growth (2021-2026)

5 AMERICAS

5.1 Americas GMP Cell Culture Custom Service Market Size by Country (2021-2026)

5.2 Americas GMP Cell Culture Custom Service Market Size by Type (2021-2026)

5.3 Americas GMP Cell Culture Custom Service Market Size by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC GMP Cell Culture Custom Service Market Size by Region (2021-2026)

6.2 APAC GMP Cell Culture Custom Service Market Size by Type (2021-2026)

6.3 APAC GMP Cell Culture Custom Service Market Size by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

7 EUROPE

7.1 Europe GMP Cell Culture Custom Service Market Size by Country (2021-2026)

7.2 Europe GMP Cell Culture Custom Service Market Size by Type (2021-2026)

7.3 Europe GMP Cell Culture Custom Service Market Size by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa GMP Cell Culture Custom Service by Region (2021-2026)

8.2 Middle East & Africa GMP Cell Culture Custom Service Market Size by Type (2021-2026)

8.3 Middle East & Africa GMP Cell Culture Custom Service Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL GMP CELL CULTURE CUSTOM SERVICE MARKET FORECAST

10.1 Global GMP Cell Culture Custom Service Forecast by Region (2027-2032)

10.1.1 Global GMP Cell Culture Custom Service Forecast by Region (2027-2032)

10.1.2 Americas GMP Cell Culture Custom Service Forecast

10.1.3 APAC GMP Cell Culture Custom Service Forecast

10.1.4 Europe GMP Cell Culture Custom Service Forecast

10.1.5 Middle East & Africa GMP Cell Culture Custom Service Forecast

10.2 Americas GMP Cell Culture Custom Service Forecast by Country (2027-2032)

10.2.1 United States Market GMP Cell Culture Custom Service Forecast

10.2.2 Canada Market GMP Cell Culture Custom Service Forecast

10.2.3 Mexico Market GMP Cell Culture Custom Service Forecast

10.2.4 Brazil Market GMP Cell Culture Custom Service Forecast

10.3 APAC GMP Cell Culture Custom Service Forecast by Region (2027-2032)

10.3.1 China GMP Cell Culture Custom Service Market Forecast

10.3.2 Japan Market GMP Cell Culture Custom Service Forecast

10.3.3 Korea Market GMP Cell Culture Custom Service Forecast

10.3.4 Southeast Asia Market GMP Cell Culture Custom Service Forecast

10.3.5 India Market GMP Cell Culture Custom Service Forecast

10.3.6 Australia Market GMP Cell Culture Custom Service Forecast

10.4 Europe GMP Cell Culture Custom Service Forecast by Country (2027-2032)

10.4.1 Germany Market GMP Cell Culture Custom Service Forecast

- 10.4.2 France Market GMP Cell Culture Custom Service Forecast
- 10.4.3 UK Market GMP Cell Culture Custom Service Forecast
- 10.4.4 Italy Market GMP Cell Culture Custom Service Forecast
- 10.4.5 Russia Market GMP Cell Culture Custom Service Forecast
- 10.5 Middle East & Africa GMP Cell Culture Custom Service Forecast by Region (2027-2032)
 - 10.5.1 Egypt Market GMP Cell Culture Custom Service Forecast
 - 10.5.2 South Africa Market GMP Cell Culture Custom Service Forecast
 - 10.5.3 Israel Market GMP Cell Culture Custom Service Forecast
 - 10.5.4 Turkey Market GMP Cell Culture Custom Service Forecast
- 10.6 Global GMP Cell Culture Custom Service Forecast by Type (2027-2032)
- 10.7 Global GMP Cell Culture Custom Service Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market GMP Cell Culture Custom Service Forecast

11 KEY PLAYERS ANALYSIS

- 11.1 Samsung Biologics Co., Ltd.
 - 11.1.1 Samsung Biologics Co., Ltd. Company Information
 - 11.1.2 Samsung Biologics Co., Ltd. GMP Cell Culture Custom Service Product Offered
 - 11.1.3 Samsung Biologics Co., Ltd. GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.1.4 Samsung Biologics Co., Ltd. Main Business Overview
 - 11.1.5 Samsung Biologics Co., Ltd. Latest Developments
- 11.2 WuXi Biologics (Cayman) Inc.
 - 11.2.1 WuXi Biologics (Cayman) Inc. Company Information
 - 11.2.2 WuXi Biologics (Cayman) Inc. GMP Cell Culture Custom Service Product Offered
 - 11.2.3 WuXi Biologics (Cayman) Inc. GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.2.4 WuXi Biologics (Cayman) Inc. Main Business Overview
 - 11.2.5 WuXi Biologics (Cayman) Inc. Latest Developments
- 11.3 Lonza Group Ltd
 - 11.3.1 Lonza Group Ltd Company Information
 - 11.3.2 Lonza Group Ltd GMP Cell Culture Custom Service Product Offered
 - 11.3.3 Lonza Group Ltd GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.3.4 Lonza Group Ltd Main Business Overview
 - 11.3.5 Lonza Group Ltd Latest Developments
- 11.4 Thermo Fisher Scientific Inc. (Patheon)

- 11.4.1 Thermo Fisher Scientific Inc. (Patheon) Company Information
- 11.4.2 Thermo Fisher Scientific Inc. (Patheon) GMP Cell Culture Custom Service Product Offered
- 11.4.3 Thermo Fisher Scientific Inc. (Patheon) GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
- 11.4.4 Thermo Fisher Scientific Inc. (Patheon) Main Business Overview
- 11.4.5 Thermo Fisher Scientific Inc. (Patheon) Latest Developments
- 11.5 FUJIFILM Holdings Corporation
 - 11.5.1 FUJIFILM Holdings Corporation Company Information
 - 11.5.2 FUJIFILM Holdings Corporation GMP Cell Culture Custom Service Product Offered
 - 11.5.3 FUJIFILM Holdings Corporation GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.5.4 FUJIFILM Holdings Corporation Main Business Overview
 - 11.5.5 FUJIFILM Holdings Corporation Latest Developments
- 11.6 Boehringer Ingelheim
 - 11.6.1 Boehringer Ingelheim Company Information
 - 11.6.2 Boehringer Ingelheim GMP Cell Culture Custom Service Product Offered
 - 11.6.3 Boehringer Ingelheim GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.6.4 Boehringer Ingelheim Main Business Overview
 - 11.6.5 Boehringer Ingelheim Latest Developments
- 11.7 AGC Inc.
 - 11.7.1 AGC Inc. Company Information
 - 11.7.2 AGC Inc. GMP Cell Culture Custom Service Product Offered
 - 11.7.3 AGC Inc. GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.7.4 AGC Inc. Main Business Overview
 - 11.7.5 AGC Inc. Latest Developments
- 11.8 Catalent, Inc.
 - 11.8.1 Catalent, Inc. Company Information
 - 11.8.2 Catalent, Inc. GMP Cell Culture Custom Service Product Offered
 - 11.8.3 Catalent, Inc. GMP Cell Culture Custom Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.8.4 Catalent, Inc. Main Business Overview
 - 11.8.5 Catalent, Inc. Latest Developments
- 11.9 KBI Biopharma, Inc.
 - 11.9.1 KBI Biopharma, Inc. Company Information
 - 11.9.2 KBI Biopharma, Inc. GMP Cell Culture Custom Service Product Offered
