Gold-plated molybdenum wire is a decorative and functional material made by metal-plating the surface of molybdenum wire. Gold-plated molybdenum wire has good electrical conductivity, thermal stability and corrosion resistance, and can be widely used in various fields, such as electronic products, heat-resistant decorations, etc. The production process is generally to surface-treat the molybdenum wire by electrochemical methods, and then coat the surface with a layer of special metal materials, such as gold and silver. The production process of gold-plated molybdenum wire needs to pay attention to the purity of the material, the treatment method and the selection of metal materials to ensure its quality and use effect.
