Abstracts

The global Golf Club and Sets market size is predicted to grow from US$ 3716 million in 2025 to US$ 4874 million in 2032; it is expected to grow at a CAGR of 4.0% from 2026 to 2032.

Golf clubs are the tools we use to strike the golf ball. A golf club has three components ? the Head, the Shaft and the Grip. The rules of golf constrain golf club designs, but the goal of clubmakers is to create golf clubs, within those constraints that maximize the physics behind a golfer's swing while allowing for some range of swing error to provide an accurate, long, and forgiving shot. The better your swing, the less forgiving club you require whereas the more your swing needs work, the better off you are with a more forgiving club design. A modern set of golf clubs typically consists of three woods (the 1-driver, 3, and 5), at least 1 hybrid (3H) seven irons (4, 5, 6, 7, 8, 9, and PW), and a putter. This gives you a total of twelve clubs. The rules of golf allow you to carry fourteen clubs in your bag, so many golfers add another wedge or specialty hybrid.

The emerging trend of golf tourism due to the presence of numerous golf courses across the world, the increase in the middle-class population, and the growth in the number of professional and amateur female golfers drive the market growth. The Gulf Cooperation Council (GCC) and Caribbean countries have become popular golf tourism destinations, owing to the availability of modern and advanced facilities. Golf is an expensive outdoor recreation activity that is popular among business individuals and amateur players.
