Rangefinders have revolutionized the way that Amateur Players play the game of golf. With the press of a button, the golfer can look through the lens of the rangefinder and immediately know the distance to the pin and yardage to various other areas on the hole, such as bunkers and hazards. The two top types of rangefinders include GPS and laser. Laser rangefinders utilize an invisible infrared laser beam to read distances, while GPS rangefinders use preloaded maps and a satellite signal to determine distance.
