The two parts are combined into the measuring part of the golf ball, which completes the measurement of the initial velocity, altitude Angle, deviation Angle and rotation of the golf ball. The 3d simulation and display part of golf course consists of computer graphics processor, high definition projector and curtain (standard 3 m ?4 m) with anti-hitting and buffering effect. This part completes the 3d simulation display of golf course ground and golf ball flight process. After the user use the golf ball measuring system will golf dynamic parameter analysis, computer graphics processor based on the simulation of the dynamic parameters of golf ball flight trajectory, real-time display on the screen, the whole process is closely combined with strike action, without any pause, the user feel as if in a real golf course to play.
