The global Goods-to-Person Picking Solution market size is predicted to grow from US$ 15050 million in 2025 to US$ 24000 million in 2031; it is expected to grow at a CAGR of 8.1% from 2025 to 2031.

Goods-to-Person Picking (GTP) is a system that automatically supplies a stock container and an order collection container to a worker. The operator only has to follow the instructions on the display and pick the required quantity from the supplied inventory containers to the order collection container.

The goods-to-person picking solution market growth is being driven by the increasing demand for e-commerce, the need for improved warehouse efficiency, and the rising adoption of automation in warehouses.

E-commerce is growing rapidly and is expected to continue to grow in the coming years. This growth is driving the demand for goods-to-person picking solutions, as e-commerce retailers need to be able to efficiently pick and pack orders to meet the demands of their customers.

The need for improved warehouse efficiency is also driving the growth of the goods-to-person picking solution market. Warehouses are under increasing pressure to operate more efficiently in order to reduce costs and improve customer service. Goods-to-person picking solutions can help warehouses to improve efficiency by reducing the time it takes to pick and pack orders.
