## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Grab hire service is a type of waste management service that involves the use of specialized vehicles equipped with a large hydraulic arm, for the collection and transport of materials. This service is particularly useful for projects that generate large volumes of waste or where access is limited, as the grab arm can reach into tight spaces and load materials directly into the lorry without the need for manual handling. This reduces the time and effort required for waste removal and can be more cost-effective than other waste collection methods. These service is commonly used in construction sites, landscaping projects, house clearances, and other situations where bulk waste removal is required.

The global Grab Hire Service market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
