The global Grain Dryer market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Grain dryer, as its name would suggest, is a machine manufactured simply to dry grain. In the United States, this is commonly used for two main crops: corn and soybeans. The grain dryer is an expensive piece of equipment and not one many farmers have. Rather, they may use the services of a farming cooperative or rent one in some situations.

The European grain dryer market is dominated by CIMBRIA, CFCAI Group, BUHLER, GSI and BROCK, and the top five manufacturers account for about 50% of the market share.

France and Germany are the largest grain dryer markets, each with a market share of about 15%, followed by Russia, Ukraine, Poland and the United Kingdom, each with a market share of about 10%.
