Abrasive pads consist of abrasive grains adhered onto the surface of a cloth, film, paper, non-woven, or other backing, usually with a die-cut square or rectangular shape. Products include hand pads, block brushes, tufts, and paint pads. Hand pads may have a round or contoured shape. Hand pads, blocks, or sticks are usually thicker than abrasive sheets and often have an integral loop or handle to help the user hold and use the pad. Block brushes consist of a brush core, handle or backing with a series of holes with hold tufts. Tufts are bunches of bristles, filaments, or wires (brush fill). The size and spacing of the tufts can be varied, depending upon the specific application. The space between the tufts provides clearance for the removal of dirt, scale, rust or other debris. Paint pads are absorbent abrasive pads that can be used to create texture patterns, or to fill paint or coatings in hard-to-reach areas.
