The global Graphene Sponges market size is predicted to grow from US\$ 3.99 million in 2025 to US\$ 23.58 million in 2032; it is expected to grow at a CAGR of 29.0% from 2026 to 2032.

In 2025, global sales volume of Graphene Sponges was approximately 3.4 tons, with an average global market price of about USD 1,200/kg. The gross margin of major producers was generally in the range of 45%?65%.

Graphene Sponges are three-dimensional porous carbon materials composed of graphene sheets. Their core advantages lie in lightweight structure, high porosity, relatively large specific surface area, good electrical conductivity, compressive resilience, and strong adsorption capacity. Compared with conventional graphene powders, Graphene Sponges feature a continuous three-dimensional conductive network and an open-pore structure, which facilitate the transport of liquids, gases, or ions within the material and enable higher structural utilization efficiency in adsorption and separation, electrochemical energy storage, sensing, and composite material reinforcement applications.

The upstream segment of Graphene Sponges mainly includes graphite, graphene oxide, reducing agents, dispersants, polymer substrates, inorganic nanoparticles, carbon nanomaterials, and drying and forming auxiliaries. The midstream segment involves redox processing, self-assembly, freeze-drying, hydrothermal forming, composite modification, and post-treatment processes to form three-dimensional porous structures. Downstream applications are mainly concentrated in environmental protection, energy, electronic, and chemical fields. The value of the industry is mainly concentrated in pore-structure control, conductive-network construction, composite-modification capability, batch stability, and performance matching for specific applications such as adsorption, energy storage, and sensing.

United States market for Graphene Sponges is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Graphene Sponges is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Graphene Sponges is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
