Grass fed beef organ supplements are nutritional products made from the organs of grassfed cattle. Grass fed cattle is raised on natural pastures and feed mainly on fresh grass. These supplements usually contain components from cattle organs such as the liver, heart, and kidneys. These organs are rich in a variety of nutrients. For example, beef liver is abundant in vitamin A, B - vitamins (such as folic acid and vitamin B12), and trace elements like iron and copper. These nutrients help support human blood health, vision, and energy metabolism. The beef heart contains high - quality protein, coenzyme Q10 and other nutrients that may have a positive effect on heart health and cellular energy production. The nutrients in beef kidneys may also provide certain benefits for the human endocrine system and metabolic regulation.
