The global Gravity Flow Racking Systems market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

There are three types of gravity flow racks: carton flow, pallet flow, and push back.

In gravity flow rack products are placed in the loading side of the system. When the front item is picked, the following item glides forward so that the next product is in the front position.

This movement of the inventory to the front position is accomplished by gravity. This makes it a cost-effective option for automatic replenishment of the front picking position.

Gravity flow systems include options for first-in, first-out (FIFO) and last-in, first-out (LIFO) inventory management. The goal of both FIFO and LIFO is to ensure the efficient flow of products while maximizing space.

United States market for Gravity Flow Racking Systems is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Gravity Flow Racking Systems is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
