The global Gravure Printing Machines market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

A gravure printing press is a machine that uses a gravure plate for printing. The image part of the printing plate is concave, while the blank part is on the same plane as the outer circle of the plate cylinder. When printing, the entire plate cylinder is inked, and the ink on the blank part of the plate is scraped off with a scraper, leaving the ink on the image part, and then the ink on the concave part is directly transferred to the paper surface through the impression cylinder.
