The global Gray Electrophoretic Paint market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Gray electrophoretic paint is a water-based paint that contains particles required for the electrophoretic process, usually metal ions or particles. These coatings use an electrophoretic coating process to form a uniform, dense, corrosion-resistant coating on the metal surface, providing a high degree of protection and appearance.

The future development prospects of the gray electrophoretic coating industry are promising, mainly based on the following trends and factors:

1. Environmental protection requirements: Global requirements for environmental protection and sustainability are increasing, and water-based electrophoretic coatings are due to their low volatile organic compound (VOC) content and water-based substrate is favored.
2. New materials and technologies: The emerging new materials and technologies make electrophoretic coatings more innovative and improve their properties, such as corrosion resistance, abrasion resistance and weather resistance.
3. Demand from the automotive industry: As one of the major markets for electrophoretic coatings, the automotive industry will continue to grow in demand for high-performance electrophoretic coatings with the rise of electric vehicles and the trend of lightweighting.
4. Global market growth: The industrialization process in emerging markets and the development of the construction industry will drive the growth of the electrophoretic coatings market, especially in regions such as Asia.
5. Automation and digitalization: Automated painting and digital processes will improve production efficiency and quality control. Make electrophoretic coatings more competitive. Taken together, the gray electrophoretic coating industry is expected to continue to grow in the future and play an

important role in various application fields, especially when meeting environmental protection and high-performance needs.
