The global Green Ammonia Stabilizer Additives market size is predicted to grow from US\$ 31.61 million in 2025 to US\$ 62.06 million in 2032; it is expected to grow at a CAGR of 9.7% from 2026 to 2032.

Green ammonia stabilizer additives are pH control agents, corrosion inhibitors, dosing stabilizers, anti-foam agents, wetting agents, dispersion agents, and process aids specifically formulated for or qualified for use with green/low-carbon ammonia systems. In 2025, global green ammonia stabilizer additives production reached approximately 17,950 ton, with an average global market price of around USD 1,800 per ton. A factory gross profit of USD 450 per ton with 25% gross margin. A single line full machine capacity production is around 100 ton per line per year. The upstream is dependent on electrolyzers, stabilizer chemicals and low VOC formulation components. The downstream demand is concentrated in industrial manufacturing, agriculture and water treatment. Urease inhibitor for green ammonia fertilizer used stabilized urea fertilizer for CO₂ reduction; less ammonia/N₂O than non-treated. Australia market is driven by export oriented projects and massive pipeline investments. India market is driven by massive public tenders and government initiatives and major projects.
