In 2025, global sales of Greenhouse PO(Polyolefin) Film reached 235 million square meters, with an average selling price of US\$1.85 per square meter and a total production capacity of approximately 260 million square meters. This product is a highly transparent, high-toughness, and UV-resistant plastic film, primarily made of polyethylene (PE) or copolymer polyolefin materials. It is widely used in agricultural greenhouse coverings, seedling sheds, and protective cultivation facilities to improve crop growth efficiency and extend the growing season. Upstream raw materials mainly consist of polyethylene resin, UV-resistant additives, plasticizers, and stabilizers. Downstream supply primarily consists of large greenhouse enterprises, small farms, and agricultural technology parks, with greenhouse covering being the main consumer component. In the future, with the development of agricultural modernization and intelligent greenhouse construction, the demand for high-performance, long-life, and controllable light transmittance polyolefin films will continue to grow. Market opportunities will focus on the research and application of high-weather-resistant films, anti-condensation films, and intelligent temperature-controlled films, providing enterprises with long-term value-added and technological upgrading opportunities.
