## Abstracts

The global GRIN Fiber Collimator market size is predicted to grow from US\$ 424 million in 2025 to US\$ 963 million in 2032; it is expected to grow at a CAGR of 12.9% from 2026 to 2032.

Global production of GRIN fiber collimators reached 3.64 million units in 2025, with an average selling price of US\$119 per unit. A GRIN fiber collimator is a passive micro-optical device that uses a graded-index lens to transform a diverging beam from the end face of an optical fiber into approximately parallel light (collimation), or to efficiently couple free-space parallel light into an optical fiber. It typically consists of a GRIN lens, a ceramic/metal sleeve, an optical fiber pigtail or connector, and a coating. It is small in size, easy to assemble, and cost-effective, and is widely used in optical communication and data center optical device testing, fiber optic sensing and interferometry systems, laser and amplifier coupling/isolation/combining, spectroscopic and metrological instruments, OCT and biophotonics systems, quantum/precision optics experimental platforms, and modular optical paths in industrial automation testing that require stable collimation and high coupling efficiency. The upstream of the industry chain includes GRIN lens materials (glass preforms, ion exchange to form gradients, cutting, grinding, polishing, and end-face wedge/beveling, AR/BBAR coating), optical fibers and connectors (ceramic ferrules, sleeves, pigtails), precision metal/ceramic tubing and potting compounds/low-VOC curing materials (high-reliability versions emphasize low outgassing and temperature cycling stability); the midstream consists of collimator manufacturers; and the downstream comprises optical communication equipment manufacturers, laser manufacturers, sensor system integrators, and research institutions. Gross profit margins typically range from 25% to 45%.

United States market for GRIN Fiber Collimator is estimated to increase from US\$

million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
