The global GRP Electrical Enclosures market size is predicted to grow from US\$ 309 million in 2025 to US\$ 461 million in 2032; it is expected to grow at a CAGR of 6.1% from 2026 to 2032.

In 2025, global GRP Electrical Enclosure reached approximately 12420 K Units, with an average global market price of around 25.4 USD per K Units.

A GRP Electrical Enclosure is a protective housing made from fiberglass-reinforced polymer designed to contain and safeguard electrical and electronic equipment from environmental, mechanical, and chemical hazards. These enclosures are widely used in industrial, utility, infrastructure, and outdoor applications where corrosion resistance, electrical insulation, and low maintenance are critical requirements.

GRP Electrical Enclosures protect internal components such as circuit breakers, control panels, relays, power supplies, and communication devices against moisture, dust, chemicals, UV exposure, and physical impact, while also helping ensure operational safety and regulatory compliance. Compared with metal enclosures, fiberglass enclosures do not rust, offer inherent electrical insulation, and perform reliably in harsh or corrosive environments.

The upstream raw materials for GRP Electrical Enclosures mainly include glass fiber, synthetic resin, and functional additives. Typical upstream raw material suppliers include Owens Corning, Saint-Gobain, Jushi Group, and Taishan Fiberglas.

Downstream applications are primarily in the State Grid and industrial power sectors. The single-line capacity and gross profit margin of GRP Electrical Enclosures are mainly affected by molding processes, automation levels, and product positioning, exhibiting a

pattern where process adapts to capacity and positioning determines gross profit. Mainstream automated production lines such as molding/SMC typically have a daily capacity of 1000-3000 units, with an annual capacity of 200,000-500,000 units. The industry average gross profit margin is 20%-30%.

United States market for GRP Electrical Enclosures is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for GRP Electrical Enclosures is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
