The global Guitar Amplifier market size is predicted to grow from US\$ 129 million in 2025 to US\$ 147 million in 2031; it is expected to grow at a CAGR of 2.2% from 2025 to 2031.

A guitar amplifier (or guitar amp) is an electronic device or system that strengthens the weak electrical signal from a pickup on an electric guitar, bass guitar, or acoustic guitar so that it can produce sound through one or more loudspeakers, which are typically housed in a wooden cabinet. A guitar amplifier may be a standalone wood or metal cabinet that contains only the power amplifier (and preamplifier) circuits, requiring the use of a separate speaker cabinet—or it may be a 'combo' amplifier, which contains both the amplifier and one or more speakers in a wooden cabinet. There is a wide range of sizes and power ratings for guitar amplifiers, from small, lightweight 'practice amplifiers' with a single 6" speaker to heavy combo amps with four 10" or four 12" speakers and a powerful amplifier, which are loud enough to use in a nightclub or bar performance.

Guitar amplifiers can also modify the instrument's tone by emphasizing or de-emphasizing certain frequencies, using equalizer controls, which function the same way as the bass and treble knobs on a home hi-fi stereo, and by adding electronic effects; distortion (also called 'overdrive') and reverb are commonly available as built-in features. The input of modern guitar amplifiers is a 1/4" jack, which is fed a signal from an electro-magnetic pickup (from an electric guitar) or a piezoelectric pickup (usually from an acoustic guitar) using a patch cord, or a wireless transmitter. For electric guitar players, their choice of guitar amp and the settings they use on the amplifier are a key part of their signature tone or sound. Some guitar players are longtime users of a specific amp brand or model. Many electric guitar players use external effects pedals to alter the sound of their tone before the signal reaches the guitar amp, such as the wah

wah pedal and the chorus pedal.

Global guitar amplifier main players are Fender, Marshall, Orange, Vox, Peavey, etc. Global top 5 manufacturers hold a share above 55%. North America is the largest market, with a share about 25%. In terms of product, combo amplifiers is the largest segment, with a share over 75%. And in terms of application, the largest application is commercial, followed by commercial.
