## Abstracts

According to this study, the global Gynecomastia Treatment market size will reach US\$ 1716 million by 2031.

Gynecomastia refers to the proliferation of the glandular tissue in the male breast or the enlargement of the male breast. The major cause of gynecomastia is the hormonal imbalance which occurs between the estrogen level and androgen activity amongst the males. Several medications such as anti-androgens, anti-depressants, etc. are also associated with the cause of gynecomastia. Gynecomastia is common in infancy, puberty and middle-aged. The symptoms of gynecomastia include swelling, nipple discharge, pain, etc. Overuse of herbal products such as tea tree or lavender used in shampoo, soaps, and lotions are also associated with gynecomastia. Based on the product type, the Gynecomastia Treatment market has been segmented into drugs and surgeries. The medications used for the treatment of gynecomastia include tamoxifen, Raloxifene, Aromatase Inhibitors, and other medications.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market

and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
