Adobe Plaster is a practical, environmentally friendly, durable, affordable, and easy to repair material that can be used instead of paint to decorate interior walls and ceilings. Earthen plasters is made from pure clays and aggregates, with coloring that comes from natural oxides and ochre mineral pigments. It also contains borax, a natural mineral anti-molding agent. Earthen plasters can improve your health. They are non-toxic, contain no volatile organic compounds (VOCs). When clay plasters meets water, it emits a negative charge. These negative ions release into the air and help humans absorb oxygen. This helps to counteract positive charges and ions emitted by electronics and certain plastics. Because these plasters are porous, they can breathe by absorbing humidity and moisture. They help control indoor climate and air quality. This helps regulate temperature, preventing the growth of mold and bacteria. All earthen plasters are fire retardant.
