The global Gyrocopters market size is predicted to grow from US\$ 57.1 million in 2025 to US\$ 65 million in 2031; it is expected to grow at a CAGR of 2.2% from 2025 to 2031.

A Gyrocopter – also known as an autogyro – is an aircraft that optically resembles a helicopter. Contrary to a helicopter, a gyrocopter also features a propeller that provides forward thrust. And unlike a helicopter, the gyrocopter's rotor is not engine-powered during flight, but merely passively powered by airstream that results from the forward propulsion. This is the so-called autorotation. Because of their lightweight and compact construction, gyrocopters are classified as Ultralight Aircrafts, which leads to considerable cost advantages of flight operations and also with regard to obtaining a flight license.

The segments of the global gyrocopters market on the basis of type are open cockpit and enclosed cockpit gyrocopters. Among of them, the segment of open cockpit occupied 65% market share.

The gyrocopters market is relative concentrated. Major manufacturers include AutoGyro, Magni Gyro, ELA Aviation, Trixy Aviation Products, Aviomania Aircraft, Celier Aviation, Aviation Artur Trendak, Sport Copter, Rotorvox, Niki Rotor Aviation, Carpenterie Pagotto, Sun Hawk Aviation, Xiangchen Tongfei, top ten manufacturers' production accounts more than 70% of the total sales. The high-end products mainly come from Europe.
