Abstracts

The global Half Brain Model market size is predicted to grow from US$ 1486 million in 2025 to US$ 2373 million in 2032; it is expected to grow at a CAGR of 7.0% from 2026 to 2032.

In 2024, global Half Brain Model production reached approximately 17.2 M units, with an average global market price of around US$ 82 per unit.A Half Brain Model is a three-dimensional anatomical teaching and demonstration model that represents one hemisphere of the human brain—either the left or right side. It is designed to illustrate the external and internal anatomical structures of the brain in an accurate, scaled, and durable form for educational, clinical, and research purposes.

Gross Profit Margin Analysis

As an important anatomical teaching tool for medical education and popular science demonstrations, the gross profit margin of hemibrain models is significantly affected by product positioning, manufacturing processes, and sales channels. Overall, the industry's gross profit margin generally remains in the range of 30%-45%, with high-end models even reaching over 50%. Low-priced PVC injection-molded products have relatively low gross profit margins due to high production standardization and intense market competition; while high-end models using precision resin casting, hand-painting, or integrated digital interactive functions have higher premium potential due to their refined craftsmanship and differentiated value. Furthermore, with the increasing demand for updated teaching equipment in global medical schools and hospitals, export-oriented companies can obtain relatively stable profit returns through OEM/ODM models. In recent years, some manufacturers have reduced distribution costs through e-commerce direct sales and branded operations, further improving overall profitability, and the industry is showing a trend of gradually expanding proportion of high-value-added niche products.

Driving Factors

The core driving forces behind the continued growth of the hemibrain model market mainly come from multiple factors, including the modernization of medical education, the deepening of neuroscience research, increased demand for medical training, and the expansion of demand for popular science demonstrations. On the one hand, the number of medical schools and the scale of medical students worldwide continue to rise, driving a rigid demand for high-precision teaching models. On the other hand, clinical training and scientific research experiments in fields such as neurosurgery, rehabilitation medicine, and psychology increasingly demand higher accuracy in understanding brain structure, prompting model manufacturing to upgrade towards deconstructibility, multi-layering, and interactivity. Simultaneously, the application of digital teaching technologies such as AR/VR is merging traditional physical models with virtual teaching platforms, creating new growth points. At the policy level, national educational equipment procurement plans and research funding support have further promoted market expansion, and the hemisphere model industry is expected to maintain steady growth in the coming years.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Half Brain Model Industry Forecast” looks at past sales and reviews total world Half Brain Model sales in 2025, providing a comprehensive analysis by region and market sector of projected Half Brain Model sales for 2026 through 2032. With Half Brain Model sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Half Brain Model industry.

This Insight Report provides a comprehensive analysis of the global Half Brain Model landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Half Brain Model portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Half Brain Model market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Half Brain Model and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of

opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Half Brain Model.

This report presents a comprehensive overview, market shares, and growth opportunities of Half Brain Model market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Key Questions Addressed in this Report

What is the 10-year outlook for the global Half Brain Model market?

What factors are driving Half Brain Model market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Half Brain Model market opportunities vary by end market size?

How does Half Brain Model break out by Type, by Application?

1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Half Brain Model Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Half Brain Model by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Half Brain Model by Country/Region, 2021, 2025 & 2032
2.2 Half Brain Model Segment by Type
  2.2.1 Silicone Model
  2.2.2 3D Printed Model
  2.2.3 Half Brain Model Sales by Type
    2.2.3.1 Global Half Brain Model Sales Market Share by Type (2021-2026)
    2.2.3.2 Global Half Brain Model Revenue and Market Share by Type (2021-2026)
    2.2.3.3 Global Half Brain Model Sale Price by Type (2021-2026)
2.3 Half Brain Model Segment by Simulation Level
  2.3.1 Low Fidelity
  2.3.2 High Fidelity
  2.3.3 Half Brain Model Sales by Simulation Level
    2.3.3.1 Global Half Brain Model Sales Market Share by Simulation Level (2021-2026)
