A hammertoe solution refers to a method or treatment aimed at addressing hammertoe, a foot deformity characterized by an abnormal bending of the toe joints. In hammertoe, the affected toe tends to bend downward at the middle joint, resembling a hammer, hence the name.

There is a broader trend in medicine toward minimally invasive procedures. In the context of hammertoe, this might involve less invasive surgical techniques that result in reduced scarring, shorter recovery times, and fewer complications compared to traditional surgical approaches.
