Many models incorporate adjustable intensity levels and additional features such as heat to enhance therapeutic benefits and user comfort. By offering a noninvasive and convenient method of hand therapy, hand compression massagers are widely used for relaxation, stress relief, and support in managing conditions associated with hand strain. In 2024, sales of hand compression massagers are expected to reach approximately 1.4 million units, with a unit price ranging from $50 to $100 and a gross profit margin between 20% and 40%.
