Abstracts

The global Hard Case Coin Cell market size is predicted to grow from US\$ 1255 million in 2025 to US\$ 1998 million in 2032; it is expected to grow at a CAGR of 7.0% from 2026 to 2032.

Hard Case Coin Cell is a compact battery enclosed in a metal casing in a coin-type form factor, designed to provide stable and reliable power for small electronic devices. The metal casing improves mechanical strength, shields the internal electrodes and electrolyte from external stress, and ensures consistent performance under various conditions. Available as either primary (non-rechargeable) or secondary (rechargeable), this battery type emphasizes robust metal housing, precise electrode arrangement, and high-quality sealing, making it suitable for both disposable and rechargeable applications in portable electronics and medical devices. In 2025, the industry capacity utilization rate was approximately 65%, and the average gross margin was about 20%. Production in 2025 reached 2.85 billion units, with an average price of 0.45 USD per unit. Upstream, the industry mainly relies on critical materials such as lithium cobalt oxide and separators, with representative suppliers including Umicore, Asahi Kasei, and Celgard, which provide key inputs influencing performance and safety. Midstream focuses on the design and manufacturing of hard case coin cells, covering electrode assembly, micro-scale cell integration, metal casing fabrication, sealing, and reliability testing to ensure stable performance and structural integrity. Downstream demand primarily comes from consumer electronics and medical devices, with key customers including Apple, Samsung Electronics, Medtronic, and Philips.

Rechargeable Lithium-ion Button Cell is increasingly becoming a core power solution for high-integration and space-constrained electronic systems, as demand rises from wearable devices, compact medical electronics, and IoT terminals that require stable, rechargeable energy with long cycle life. Its advantages in energy density and voltage stability enable reliable performance in applications such as wireless earbuds, health

monitoring devices, and precision sensors, where continuous operation and compact form factors are critical. The industry is undergoing a transition from disposable to rechargeable architectures, reflecting a broader shift toward lifecycle cost efficiency and sustainability. At the same time, advancements in micro-scale electrode engineering, high-performance material systems, and sealing technologies are improving safety and consistency, supporting adoption in higher-reliability scenarios. While manufacturing complexity and cost control remain key challenges, leading players are enhancing yield and scalability through process optimization. As downstream demand becomes more quality-driven, the competitive landscape is shifting toward high-value applications, where performance differentiation and reliability standards provide stronger margin support.

LP Information, Inc. (LPI) ' newest research report, the "Hard Case Coin Cell Industry Forecast" looks at past sales and reviews total world Hard Case Coin Cell sales in 2025, providing a comprehensive analysis by region and market sector of projected Hard Case Coin Cell sales for 2026 through 2032. With Hard Case Coin Cell sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Hard Case Coin Cell industry.

This Insight Report provides a comprehensive analysis of the global Hard Case Coin Cell landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Hard Case Coin Cell portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Hard Case Coin Cell market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Hard Case Coin Cell and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Hard Case Coin Cell.

This report presents a comprehensive overview, market shares, and growth opportunities of Hard Case Coin Cell market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Rechargeable

Non-rechargeable

Segmentation by Cell Chemistry:

Lithium-ion Button Cells

Nickel-metal Hydride Button Cells

Solid-state Button Cells

Segmentation by Capacity:

Capacity

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Hard Case Coin Cell Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Hard Case Coin Cell by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Hard Case Coin Cell by Country/Region, 2021, 2025 & 2032
- 2.2 Hard Case Coin Cell Segment by Type
 - 2.2.1 Rechargeable
 - 2.2.2 Non-rechargeable
 - 2.2.3 Hard Case Coin Cell Sales by Type
 - 2.2.3.1 Global Hard Case Coin Cell Sales Market Share by Type (2021-2026)
 - 2.2.3.2 Global Hard Case Coin Cell Revenue and Market Share by Type (2021-2026)
 - 2.2.3.3 Global Hard Case Coin Cell Sale Price by Type (2021-2026)
- 2.3 Hard Case Coin Cell Segment by Cell Chemistry
 - 2.3.1 Lithium-ion Button Cells
 - 2.3.2 Nickel-metal Hydride Button Cells
 - 2.3.3 Solid-state Button Cells
 - 2.3.4 Hard Case Coin Cell Sales by Cell Chemistry
 - 2.3.4.1 Global Hard Case Coin Cell Sales Market Share by Cell Chemistry (2021-2026)
 - 2.3.4.2 Global Hard Case Coin Cell Revenue and Market Share by Cell Chemistry (2021-2026)
 - 2.3.4.3 Global Hard Case Coin Cell Sale Price by Cell Chemistry (2021-2026)
- 2.4 Hard Case Coin Cell Segment by Capacity

2.4.1 Capacity
