The global Hardware-FDE market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

FDE represents Full-Disk Encryption. Full-disk encryption (FDE) and self-encrypting drives (SED) encrypt data as it is written to the disk and decrypt data as it is read off the disk. FDE makes sense for laptops, which are highly susceptible to loss or theft. But FDE isn't suitable for the most common risks faced in data center and cloud environments.

Asia-Pacific is the fastest growing market.
