An HDMI matrix switcher is a device that allows the central distribution and control of multiple digital and analog HDMI AV signals from one location. These devices simplify the routing of AV signals from a range of input sources, such as PCs, Blu-ray players and surveillance cameras, to one or more output sources, such as TVs, monitors and projectors.

HDMI matrix switchers are ideal for any application that requires customizable, high-speed AV signal routing from multiple sources to one or more destinations.
