An HUD is a display indicator that displays the key flight information onto a transparent screen positioned in front of a pilot's line of sight. HUD finds its applications in the automotive and aviation sectors. It helps increase the situational awareness and enhances safety margins in these sectors. The following are the primary components of an HUD: combiner, projector unit, display panel, and video generator.

One trend in the market is emergence of DLE technology for HUDs. HUDs are becoming a fundamental part of almost all military programs, including those for military platforms like vehicles and aircraft and wearable gears for dismounted soldiers. The traditional HUD designs incorporate many heavy, degradable, and maintenance-
