The report requires updating with new data and is sent in 48 hours after order is placed.

Digital business initiatives require the frictionless sharing and flow of data among applications, people, processes, things and platforms — including the Internet of Things (IoT) and mobile back end as a service (MBaaS). The support of both systematic and adaptive approaches to integrating a wide variety of endpoints and data formats, domains, constituents and delivery models is what Gartner refers to as 'pervasive integration.' This is enabled by an HIP — notably, on-premises and cloud-based integration technologies securely connected so that the combination supports the integration of on-premises endpoints, cloud endpoints, and a combination of the two, for all integration patterns.
