Heat Reflective Roof Waterproof Coating is a specialized surface treatment designed to protect roofs from water infiltration while reflecting solar radiation to reduce heat absorption. These coatings are typically made from advanced polymers and pigments with high solar reflectivity and thermal emissivity, helping to keep buildings cooler by minimizing the heat transferred indoors. In addition to preventing water leakage, they enhance energy efficiency, reduce cooling costs, and extend the lifespan of roofing materials by protecting against UV radiation and thermal stress. Commonly applied to flat or low-slope roofs, they are used in residential, commercial, and industrial settings.
