Heat Shrink Butt Splices are high performance wire splicing connectors that are designed for environmentally harsh conditions such as outdoor or wet areas. These butt connectors can be crimped using the insulated crimp nest on any ordinary pair of wire crimpers. Be sure to use the correct color coded nest to ensure the best crimp on your splice. Heat shrink insulation protects against corrosion and moisture, and add in the adhesive inner lining that flows with heat and makes the splice waterproof and environmentally sealed. Excellent splicing connector for marine, automotive, and outdoor use.
