Disconnects are a type of terminal intended to be disconnected and reconnected multiple times. This makes them ideal for use where field serviceability is an issue. Disconnects are a great way to protect electrical connections. Whether dealing with mechanical abuse, wire pull-out, or abrasion, they are a solid choice for longevity. Disconnects are sometimes known as quick connects or slip-on connectors.

Heat Shrink Disconnect Terminals are high performance push-on terminals with an adhesive lined heat shrink insulation that completely seals around the wire after the terminal is crimped. They are the perfect solution for protecting your connection against corrosion and water intrusion. Heat shrink push-on terminals are excellent for use in automotive, marine or other harsh environments.
