The Production is about 80,000 units. Heavy Duty Vehicle Lift is a lifting system designed for trucks, buses, construction vehicles, and other large commercial vehicles. It typically uses hydraulic, electric, or electromechanical drive systems to raise vehicles for maintenance and repair operations. These lifts are characterized by high load capacity, strong stability, and large lifting heights, and are widely used in vehicle manufacturing plants, repair workshops, dealerships, and commercial vehicle service centers.

Heavy duty vehicle lifts are evolving toward greater intelligence, higher load capacity, and enhanced safety through technologies such as automatic synchronization control, remote monitoring, and fault diagnostics. With the growth of electric commercial vehicles and electric buses, future systems will increasingly support battery chassis maintenance and modular repair requirements. In addition, the industry is moving toward energy-efficient hydraulic systems, wireless controls, and modular designs to meet the needs of large-scale and smart maintenance facilities.
